YAMAHA GOLF-CAR COMPANY
COVID-19 BEST PRACTICES

As a valued customer of Yamaha, we truly hope that our products have provided you, your family, and your friends with many enjoyable experiences. Times will get better, and very soon we will again enjoy creating more memories that will last for years to come.

During this time, we wanted to provide some best practices that we’ve compiled surrounding proper Yamaha vehicle cleaning and disinfecting. We believe that by working together, we can help stop the spread of this virus.

As of right now, golf remains one of the safer forms of exercise in which people may participate. Should any of our customers wish to play, we would recommend proper precautions be taken.

CLEANING AND DISINFECTING GUIDELINES FOR YAMAHA VEHICLES

According to the World Health Organization, cleaning refers to removing dirt and germs from surfaces. Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of spreading infection. Disinfecting, however, refers to using chemicals to kill germs on surfaces by destroying their ability to cause disease after cleaning. It can be an effective way of reducing spreading germs.

As our knowledge and understanding of the virus continues to evolve, both cleaning and disinfecting will be a critical part of the defense against COVID-19.

WEAR APPROPRIATE GEAR:
Be sure to wear personal protective gear (such as disposable gloves) when cleaning or disinfecting cars between uses.

USE PROPER DISINFECTANTS:
Alcohol-based hand sanitizers, 60% alcohol, or household disinfectant solutions are effective for killing COVID-19. Please visit this link for a complete list of EPA-recommended disinfecting products.

WIPE DOWN SURFACES:
Wipe any surfaces that you personally touch (such as the steering wheel, seat, hand holds, gear, bag straps, etc.)

KEEP HAND SANITIZER CLOSE:
Keep alcohol-based hand sanitizer available for all customers and employees to use.

WE ARE REOPENING WITH NEW SAFETY MEASURES IN PLACE:
Thank you for your patience. We have implemented a number of new safety measures to ensure the well-being of our customers and employees.
